We leaned the phone on a book, but it might be better to have a proper mic mount...

And thanks to Jennifer for putting some use to the equipment!

No handheld mic; the "spot" in the case was for the mini tripod. These only include the lapel mic and mini shotgun mic. I can try and order another mic mount, but I don't think it is really affecting its purpose. I believe it was broken prior by getting crushed/mounted prior.

Thanks,  
Json

+Json, Andrew, & Chris

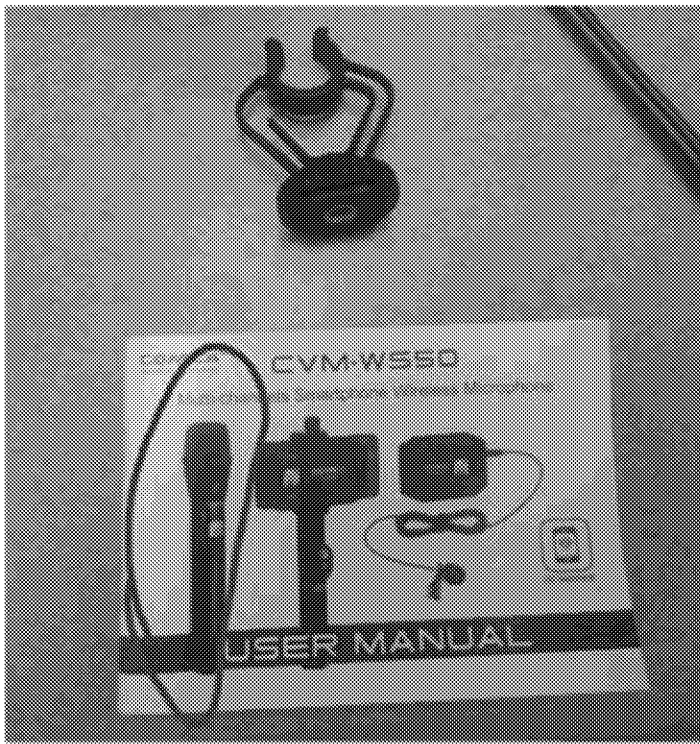

Hi Jennifer,

I wanted to confirm that I did receive the go-bag back with all of its components, and I also want to officially recognize you as the first adventurous soul in the CIC group to check one of the go-bags out! 😊

I know we already chatted briefly about how things worked out fine at the VB/I-70 CAG meeting, but if you think of any other feedback, please feel free to share it later on.

Json—a few things about the go-bag that I have at my desk:

- Will we be able to get a replacement for the broken (prior to Jennifer's check-out) piece for the microphone?
- Do we have the microphone pictured on the cover of the user guide and it's not just part of the go-bag, or do we not have it at all? Jesse the RPM noticed the microphone-shaped hole in the foam and asked where the mic was.

Best Regards,  
Yani

Thanks so much for the help with that last week.
